

“We are an entrepreneurial, discovery-driven investment group that incubates and finances early-stage mineral exploration projects globally.”

Our team utilizes cutting edge geoscience to generate large-scale exploration targets with potential for Tier-one discovery and massive financial reward.

We have a portfolio of companies operating in mining-friendly jurisdictions, two of which have multi-year exploration agreements with Newmont and AngloGold Ashanti.

We make investments in select, undervalued exploration companies with quality management.

Alistair Waddell
BSc (Hons.), MAusIMM
