

HOW CAN I ACCESS GTK'S PUBLIC INFORMATION?

Geological database:

GTK's geological database comprises geological, geochemical and geophysical research data. The geological database is stored in the geodata system.

Datasets:

The geological database includes research data on bedrock, soil, marine geology and geoenergy as well as on groundwater, peat and mineral deposits.

Data groups (some datasets are subject to fees):

Data products such as spatial data products, publications and reports

Observation data, such as sample data

Measurement data, such as analyses of samples

Interpreted data, such as 3D models and interpretation maps

Data systems:

- Geo.fi (datasets, map and user interface services; <https://www.gtk.fi/en/services/data-sets-and-online-services-geo-fi/>)
- Hakku (search and distribution system for data products; <https://hakku.gtk.fi/en/>)

Contact details for requesting information:

geodata@gtk.fi

HOW CAN I ACCESS INFORMATION ON GTK'S ADMINISTRATIVE MATTERS?

Database:

GTK registry office's database (case data)

Datasets:

The case management system includes data collected during the lifecycle of a case and documents

Official statutory case handling data

Data groups (data requests in accordance with the Act on the Openness of Government Activities):

Procurement data

Data related to GTK's projects

Statements from experts

Recruitment information

Data system:

Juoni (Tweb): case management system

DocuShare: document register

GTK registry office's paper archive (analog)
